in 2009 when raquel cepeda almost lost her estranged father to heart disease she was terrified she d never know the truth about her ancestry every time she looked in the mirror cepeda saw a mystery a tapestry of races and ethnicities that came together in an ambiguous mix with time running out she decided to embark on an archaeological dig of sorts by using the science of ancestral dna testing to excavate everything she could about her genetic history digging through memories long buried she embarks upon a journey not only into her ancestry but also into her own history born in harlem to dominican parents she was sent to live with her maternal grandparents in the paraíso paradise district in santo domingo while still a baby it proved to be an idyllic reprieve in her otherwise fraught childhood paraíso came to mean family home belonging when cepeda returned to the us she discovered her family constellation had changed her mother had a new abusive boyfriend who relocated the family to san francisco when that relationship fell apart cepeda found herself back in new york city with her father and european stepmother attending tennis lessons and catholic schools fighting vicious battles wih her father who discouraged her from expressing the dominican part of her hyphenated identity and immersed in the 80s hip hop culture of uptown manhattan it was in these streets through the prism of hip hop and the sometimes loving embrace of her community that cepeda constructed her own identity years later when cepeda had become a successful journalist and documentary filmmaker the strands of her dna would take her further across the globe and into history who were her ancestors how did they and she become latina her journey as the most unforgettable ones often do would lead her to places she hadn t expected to go with a vibrant lyrical prose and fierce honesty cepeda parses concepts of race identity and ancestral dna among latinos by using her own dominican american story as one example and in the process arrives at some sort of peace with her father

the author of the acclaimed bestseller *Bobos in Paradise* which hilariously described the upscale american culture takes a witty look at how being american shapes us and how america's suburban civilization will shape the world's future take a look at americans in their natural habitat you see suburban guys at home depot doing that special manly waddling walk that american men do in the presence of large amounts of lumber super efficient uber moms who chair school auctions organize the pta and weigh less than their children workaholic corporate types boarding airplanes while talking on their cell phones in a sort of panic because they know that when the door closes they have to turn their precious phone off and it will be like somebody stepped on their trachea looking at all this you might come to the conclusion that we americans are not the most profound people on earth indeed there are millions around the world who regard us as the great bimbos of the globe hardworking and fun but also materialistic and spiritually shallow they've got a point as you drive through the sprawling suburbs or eat in the suburban chain restaurants which if they merged would be called chili's olive garden hard rock outback cantina questions do occur are we really as shallow as we look is there anything that unites us across the divides of politics race class and geography what does it mean to be american well mentality matters and sometimes mentality is all that matters as diverse as we are as complacent as we sometimes seem americans are united by a common mentality which we have inherited from our ancestors and pass on sometimes unreflectingly to our kids we are united by future mindedness we see the present from the vantage point of the future we are tantalized at every second of every day by the awareness of grand possibilities ahead of us by the bounty we can realize just over the next ridge this mentality leads us to work feverishly hard move more than any other people on earth switch jobs switch religions it makes us anxious and optimistic manic and discombobulating even in the superficiality of modern suburban life there is some deeper impulse still throbbing in the heart of average americans that impulse is the subject of this book

consistently entertaining and often downright funny the new yorker wry and revelatory the new york times a romp packed with tales of anger violence theft lust greed political chicanery and transportation policy gone wrong highly entertaining the los angeles times an entertaining enlightening and utterly original investigation into one of the most quietly influential forces in modern american life the humble parking spot parking quite literally has a death grip on america each year a handful of americans are tragically killed by their fellow citizens over parking spots but even when we don't resort to violence we routinely do ridiculous things for parking contorting our professional social and financial lives to get a spot indeed in the century since the advent of the car we have deformed and in some cases demolished our homes and our cities in a sisyphian quest for cheap and convenient car storage as a result much of the nation's most valuable real estate is now devoted exclusively to empty and idle vehicles even as so many americans struggle to find affordable housing parking determines the design of new buildings and the fate of old ones patterns of traffic and the viability of transit neighborhood politics and municipal finance the quality of public space and even the course of floodwaters can this really be the best use of our finite resources and space why have we done this to the places we love is parking really more important than anything else these are the questions slate staff writer henry grabar sets out to answer telling a mesmerizing story about the strange and wonderful superorganism that is the modern american city in a beguiling and often absurdly hilarious mix of history politics and reportage grabar brilliantly surveys the pain points of the nation's parking crisis from los angeles to disney world to new york stopping at every major american city in between he reveals how the pathological compulsion for car storage has exacerbated some of our most acute problems from housing affordability to the accelerating global climate disaster ultimately lighting the way for us to free our cities from parking's cruel yoke

at times it had seemed so irrational to me to endure this seven years of misery just to end it all the day it was up of course it was no more irrational than what carol did but she had her reasons and i had mine the thought of that unhappy spirit wandering around wherever all that takes place had filled me every night of the past seven years with guilt and remorse that was why i was doing it mainly while putting myself beyond the reach of the law at least that s what they d told us on superman i was also atoning in front of carol for the way i d treated her at the end every day i spoke to her about it every day i d renewed my pledge to meet her every day she had the chance to see me suffer for what i d done to her at least now i felt i had purged myself of my guilt in her eyes
