the performance of most tasks with one hand typically the right is a uniquely human characteristic not only do people prefer to use one hand rather than the other but also they usually perform tasks faster and more accurately with this hand the study of manual asymmetries and what such performance differences between the two hands reveal about brain organization and motor function has been a topic of considerable research over the last several decades the aim of this research topic is to review and further explore the origins of manual asymmetries and their relationship to handedness unimanual and bimanual motor performance and brain function the articles included here involve original research conducted in humans or non human models species as well as theoretical perspectives review articles and meta analyses

decision making arises when we wish to select the best possible course of action from a set of alternatives with advancements of the digital technologies it is easy and almost instantaneous to gather a large volume of information and or data pertaining to a problem that we want to solve for instance the world wide web is perhaps the primary source of information and or data that we often turn to when we face a decision making problem however the information and or data that we obtain from the real world often are complex and comprise various kinds of noise besides real world information and or data often are incomplete and ambiguous owing to uncertainties of the environments all these make decision making a challenging task to cope with the challenges of decision making searchers have designed and developed a variety of decision support systems to provide assistance in human decision making processes the main aim of this book is to provide a small collection of techniques stemmed from artificial intelligence as well as other complementary methodologies that are useful for the design and development of intelligent decision support systems application examples of how these intelligent decision support systems can be utilized to help tackle a variety of real world problems in different main e g business management manufacturing transportation and food industries and biomedicine are also presented a total of twenty chapters which can be broadly divided into two parts i e

quality assurance qa in open and distance learning odl can be a contentious issue some argue that it should be judged by the same criteria and methods as face to face education while others claim that it is so different in its organization enrolments and operations that conventional qa mechanisms cannot apply some advocate the use of specific guidelines and standards for e learning others believe that regardless of the technology the basic principles of quality teaching and learning should apply providers who have enjoyed freedom from external scrutiny may resist attempts at external regulation and auditing and look upon qa as yet another

imposition of corporatization and bureaucracy on education others see it as a means of establishing a culture of quality self reflection and self improvement there is little research based literature to guide policy makers managers and practitioners in applying qa in education and training to ensure the right balance is found between accountability and autonomy as well as assuring quality for the time and costs involved in this respect quality assurance and accreditation in distance education and e learning is a book that is long overdue it explains what is involved in qa and accreditation in education it describes and analyzes applications of these practices in open distance dual mode and conventional universities throughout europe north america africa and the asia pacific looking at open schooling e learning in conventional schools non formal adult and community education and corporate and small to medium enterprises quality assurance and accreditation in distance education and e learning is edited and authored by experts with extensive international experience in odl e learning and qa who give careful consideration to the possibilities and challenges involved the book will be an invaluable guide for all policy makers managers practitioners and researchers in the field
