## Bricklaying and Plastering Theory N1 Student's Book

2021-02-21

robert scott burn wrote this book in 1871 at a time of great developments in science industry and exploration and when materials for engineering and building were constantly being improved and replaced

it offers therefore a useful coverage of both traditional techniques and materials such as stone brick and pise but also examines the developments in the use of cement for wall covering as well as cement blocks to be used as artificial stone this reprint of the original work contains over 400 pages of text dealing with materials practical construction techniques masonry and brickwork principles of design drawing plastering and wall decoration as well as many other aspects of construction the 160 plates which accompany the text include a large number of drawings of different parts of buildings including window door and wall details in various styles arches staircases consoles and brackets in stone and terracotta hollow and ornamental brickwork and designs of shop fronts

## ***Bricklaying and Plastering Theory***

2019

the first edition of this important book was originally published in 1897 but it is still viewed by most traditional plasterers as the plastering bible now available in this facsimile edition this impressive volume

presents a comprehensive coverage of traditional plasterwork including everything from plain lime plastering through to hand modelling and cast plasterwork written by william millar who had practical first hand experience of using these methods the book provides a fascinating and unique record of a craftsman s intimate knowledge of these traditional materials and techniques this the only detailed work currently available on this subject contains a vital record of craft skills being practised 100 years ago fully illustrated examples of decorative ceilings and other features and in depth instructions for making casts and moulds

## **Bricklaying and Plastering Theory**

2012

first published in 1927 by the building research station this volume provides a classification of lime and a complete review of its various uses in building construction and repair this facsimile edition should be of interest and of practical value since the methods terminology and practices detailed by cowper are still valid today a brief historical introduction to the subject is followed by a section on the process of lime burning which emphasizes the differences in behaviour of the various classes of limes the results of research and tests to determine the most reliable and lasting limewashes and lime based cold water paints are also detailed in addition the book provides useful information on the common problems occurring with lime plasters and how these can be solved the classifications based and suggested applications in the book offer guidelines for the conservation practitioner
