1984

296 pages and more than 200 illustrations and charts size 8 25 x 10 75 inches this workshop manual is possibly the most comprehensive publication ever produced for the 1962 through 1970 royal enfield 750cc interceptor a compilation of five factory

publications it includes the original mk1 or series i workshop manual for the 1962 to 1966 models and the later workshop manual for the 1968 to 1970 mk2 or series ii in addition it also includes the three illustrated factory spare replacement parts manuals the difficult to find 1962 66 mk1 the 1967 68 mk1a and the 1969 70 mk2 models which also includes the often missing 1970 supplement while royal enfield never issued a workshop manual that was specific to the mk1a model the later mk2 manual when used in conjunction with the mk1a parts manual it will provide adequate maintenance and repair information this manual covers the following models 750cc royal enfield interceptor mk1 workshop parts manuals the workshop manual covers both the early and late mk1 models and both the uk and the usa variants 750cc royal enfield interceptor mk1a parts manual 750cc royal enfield interceptor mk2 workshop parts manuals the workshop manual also includes data that is specific to the 1962 to 1968 models production details the 750cc uk interceptor mk1 or series i model was produced from september 1962 through december 1965 the 1964 line up was expanded to include a standard 6 volt model september 63 to august 64 plus a de luxe model with 12 volt electrics then in january 1966 interceptor production was temporarily suspended for the uk market until september 1967 however when uk production resumed the 750cc interceptor mk1a now fitted with coil ignition and amal concentric carburetors was released october 67 to september 68 the final variant the mk2 or series ii was produced from october 1968 to july 1970 however as both the 1969 70 clymer indian enfield and the 1970 72 rickman enfield utilized the mk2 engine this manual will also be of use to owners of those rare models due to a number of different reasons there is a great deal of confusion surrounding production details and the various differences between the uk and usa interceptor models firstly it is a known fact that the engine and frame numbering procedure did not follow a pattern and at times was somewhat random adding to this confusion is that during the 1966 1967 factory shut down of uk interceptor production various models were still being built for export to the usa then beginning in march 1967 the company went through a number of significant changes in manufacturing location management ownership rights and mergers however it is known that in 1964 the usa interceptor became the tt model the custom model was added in 1965 and the gt in 1966 consequently it is very likely that the interceptor models produced for the usa during the 1966 1967 uk market shut down included the custom and the tt and gt variants there were two mk1a models produced for the usa market the tt7 scrambler and the gp7 road racer the final uk usa model the mk2 was introduced for 1968 and remained in production through mid 1970 the cover image is a 1970 mk2 and the previous optional air cleaner oil cooler skid plate and seat rail were all fitted as standard equipment however the larger fuel tank was still an option in order to help identify the subtle differences between the uk and the usa models the reader is encouraged to review all three parts manuals and both workshop manuals prior to performing any adjustments or repairs it should be noted that the mk2 workshop manual contains information that is also specific to the earlier models including the mk1

Subaru Sambar English Parts & Diagram Manual

1966-02-15

196 pages and more than 83 illustrations and charts size 8 25 x 10 75 inches this publication is a reproduction of two original velocette factory manuals the october 1955 service manual part number f50 7r and the march 1958 illustrated parts manual part number f132 11r the parts manual is invaluable as it details changes in construction by engine number and or model year the original 118 page factory service manual covers the 1933 1952 range of 250cc 350cc and 500cc rigid frame models and both the iron cylinder head and aluminum head machines it includes the 1933 1948 mov and the 1935 1948 mss with webb girder forks and the 1934 1952 mac the mac models covered are the 1934 1948 with webb girder forks the 1948 1950 with

dowty oleomatic forks and the 1951 1952 models with veloce telescopic forks in addition a reproduction of the factory service and maintenance manual for dowty forks is included the original 68 page illustrated parts manual covers both the mov and mac models listed above it also includes diagrams and parts listings for the webb dowty and velocette forks the 350cc mac is possibly the most popular velocette model ever built it evolved from the 250cc mov by lengthening the stroke of the mov crankshaft from 68 25 to 96 mm from 1933 1939 the mac was constructed with a rigid frame fitted with webb girder forks from 1940 1941 a version of the mac was the basis for the company s world war ii military motorcycles the military models were mdd and maf factory dispatch records state 1320 were produced in 1946 after the war mac civilian production restarted and in 1948 the mac s webb girder forks were replaced with innovative air sprung oil dampened dowty oleomatic forks in 1951 the dowty forks were replaced by veloce telescopic forks with coil springs and oil damping in june of that same year the engine was upgraded to an aluminum barrel and head with wider fins to improve cooling for 1953 the mac was updated with fully adjustable rear swinging arm suspension and a tube frame production of the rigid frame mac ended in 1952 swing arm production ended in 1960 based on the factory part numbers there were approximately 20 service and parts manuals published during the 20 year production run of the rigid frame machines however the print quality of the later factory manuals was not the best as the same pages or sections from earlier publications were re printed multiple times as the newer manuals were published unfortunately this created problems in print quality and print density in those later manuals resulting in both light and heavy print on the same page while we have done our best to correct as many of those imperfections as possible there are some occurrences that just could not be corrected therefore we request your indulgence in tolerating any variations that still exist and accept that the intention in reproducing these manuals was to provide the reader with information that would assist in the renovation and maintenance of these classic velocette motorcycles
