underpinnings of metropolitan governance analyzing why political technical and administrative arrangements at this level of government are needed section 2 deepens the discussion by addressing specific sectoral themes of mobility land use planning environmental management and economic production as well as crosscutting topics of metropolitan governance finance and monitoring and evaluation section 3 tests the concepts and their sectoral adaptations against the practice with cases from africa america asia and europe

eThekwini's Green and Ecological Infrastructure Policy Landscape

2020-08-31

this book offers the reader a deeper understanding of the ethekwini metropolitan municipality s green and ecological infrastructure policy landscape the author utilises the pulse3 analytical framework to conduct an in depth examination and to show how experts frame and implement the municipality s green and ecological infrastructure strategies and projects although the initial purpose of this book was to investigate the role of green and ecological infrastructures in ethekwini s water security aspirations the author realised that climate change adaptation and mitigation play a more central role in motivating the municipality to develop and implement such science driven projects to be sure science that is informed by a positivist paradigm guides how where and when the municipality should develop green and ecological

World Cities Report 2016 *2016-07-14*

apartheid south africa was often thought to run in the interests of the business elite yet 27 years after apartheid those business interests remain largely entrenched why did the south african business community play a role in engineering this outcome perhaps recognising the apartheid era was over and jumping ship in time conversely the mission of the anc was widely perceived to be to shift wealth and power into the hands of the whole community yet despite black empowerment measures corporate ownership remains largely in white hands and certainly in the hands of an elite few even though no longer restricted to whites this picture is replicated across the global south where corporate ownership tends to be concentrated in the hands of an elite rather than being more democratically spread why have alternative corporate forms not been pursued more vigorously with ownership in the hands of customers employees and local communities in the case of south africa where the majority of customers and employees are black this could have delivered on the anc s mission to replace the apartheid era with a democratic one in terms of wealth incomes and power as well as in terms of voting and civic rights this edited volume explores all these questions and looks at ways to align corporate forms with economic and social goals the chapters in this book were originally published as special issues of international review of applied economics
