The Law and Economics of Globalisation 2021 ten experts offer forthright views on the problems promises of globalisation

Globalization 2005 this study examines the role of the various processes entailed in globalisation in the rise of the new right in italy and germany the first section aims to clarify what is meant by the term globalisation for it is more easily used than defined thus several perspectives such as those of the tranformationalists and the hyperglobalists are taken into account then economic and cultural globalisation considered to be the most influential forms of globalisation are analysed in depth the second part specifically examines the italian and the german cases by analysing the political and ideological discourse of successful new right cultural movements and parties such as the italian northern league and national alliance this analysis explains the difference between the populist new right and the extreme right and how the rise of new right parties can be linked with the strengthening of cultural and economic globalisation

Assessing the Role of Globalisation in the Rise of New Right Attitudes in Germany and Italy 2016-09-26 the past 30 years are often depicted as an era of globalisation and even more so with the recent rise of global giants such as google and amazon this updated and revised edition of the handbook of globalisation offers novel insights into the rapid changes our world is facing and how best we can handle them with multi disciplinary contributions from leading experts this handbook covers a broad spectrum of issues and opportunities surrounding modern globalisation it explores the idea that globalisation is not new natural or inevitable but rather that current global arrangements are the result of corporate pressure and the choices of politicians it highlights the fact that the deregulated free market form of globalisation is not unavoidable and explores a new era of global co operation based around a green new deal it also considers the future of globalisation in the face of the trump presidency brexit and the move towards more state centred policies this handbook continues to be a vital resource for scholars students and researchers of economics international relations and business and management who wish to gain a more in depth understanding of globalisation from a variety of different disciplines politicians and policy makers will also benefit from the advice offered to avoid some of the increasingly negative impacts of our globalising world contributors include p arestis e braunstein p brosnan h j chang c craypo g demartino g dymski g epstein a glyn j heintz c hines p hirst g m hodgson j howells g ietto gillies m koenig archibugi s lee p lysandrou j michie j g palma m panic j perraton j plasmans m sawyer s sinclair a singh j stanford b sutcliffe g thompson j toyne f wilkinson r woodward a zammit

The Handbook of Globalisation 2019 in the new unipolar world of globalisation the bargaining power and sense of solidarity of third world countries have never been weaker but their shared problems this author argues remain a reality which requires political expression but does the third world still even exist what role if any can it have in the 21st century s new topography of power and with what agenda these are the critical questions explored these questions lead the author into his second

theme latin america has long had to confront how to conduct its relations with an over mighty neighbour the usa it may now be well placed to help developing countries concert together to this end the author explores modern latin american history with emphasis on the changes wrought in the 1980s and 90s in the context of the continent s wider relations with the third world and the usa the result is an insightful account of where developing countries now are and how they might seek to reassert themselves in order to defend their interests in the new world order

The Third World in the Age of Globalization 1999 globalization is one of the key concepts of our time it is used by both the right and the left as the cornerstone of their analysis of the international economy and polity in both political and academic discussions the assumption is commonly made that the process of economic globalization is well under way and that this represents a qualitatively new stage in the development of international capitalism but is there in fact such a thing as a genuinely global economy globalization in question investigates this notion providing a very different account of the international economy and stressing the possibilities for its continued and extended governance the new edition of this best selling text has been thoroughly revised and updated to take into account new issues which have become salient in the period since the first and second editions were published several new chapters have been added and others combined or re written to assess the growing supra national regionalization of the international economy the emergence of india and china as new super powers and the possibilities for the continued governance of the global system a new author has been added to strengthen the analytical embrace of the book given the untimely death of paul hirst in 2003 globalization in question s third edition is a continuing intervention into current discussions about the nature and prospects of globalization the book has far reaching implications which will be of interest to students and academics in a number of disciplines including politics sociology economics and geography as well as to journalists and policy makers

Globalization in Question 2015-01-28 the growth paradigm or the economic growth generally been presented as a positive limitless and good for social problems the term was hardly touched in pre capitalism by any academic research with the rise of capitalism and industrial revolution it became an important tool to measure production quantitatively and qualitatively industrialisation also encouraged the expansion of trade and gradual breakdown of the pre capitalist order in 18th century in britain the spread of market had facilitated the specialisation encouraging division of labour whilst for the classical political economists adam smith david ricardo and thomas malthus economic growth is self reinforcing marx pointed out importance of forces and relations of production and significance of social classes within it marx 1863 smith ricardo and malthus were writing at a time when capitalist development was expanding fast and growth was a central in the process the gradual impact of the west on the rest of world became part of a wider process of change in the world economy european capital increased its domination of the world trade through expansionist commercial policies wallerstein 1979 the economic growth encouraged commerce the necessity to export and other technological changes formed part of the reason for the decline of feudalism this transition from feudalism to capitalism began in the west and soon made an impact on the rest of the world t farhang morady hakan kapucu Ömer yalçınkaya development growth economic impacts of globalization 12 in 1932 simon kuznets the us economist identified gross domestic product gdp to measure the national output of a country within a period it has continued to be an important indicator to measure economic growth but it has also been under considerable criticisms for example gdp treats resources as income without excluding depletion or depression of the resources moreover gdp has been criticised for disregarding income distribution despite all the criticism gdp has been the most significant indicator of growth and development with the post war ii reconstruction of devastated countries and in order to kick start the world economy the state in both developed and developing counties became the important agency to facilitate economic growth the establishment of the bretton woods institutions the keynesian model of government intervention and the us implementation of new deal facilitated growth this was deliberate strategy to reconstruct and create networks of international cooperation this was pointed out by president truman in 1949 a program of development based on the concepts of democratic fair dealing all countries including our own will greatly benefit from a constructive program for the better use of the world s human and natural resources truman 1949 this meant the reinforcement and need to distribute the benefits of capitalist form of development more widely against the planned economy sustained by the soviet union the economist such as joseph schumpeter pointed to the possibility that capitalist growth if it is sustained could abolish poverty schumpeter 1954 pp66 68 whilst development meant rapid industrialisation gdp became a key policy

objective for the policy makers and governments around the world not just in the soviet union but the western capitalist world to set targets for their growth rate the end of the cold war in the 1980s for some meant triumph of neoliberal capitalism the others talked of trade liberalization free movement of capital and the development of information technology facilitating the relocation of businesses across the world ohmae 1995 friedman suggested that globalization is the inevitable integration of markets nation states and technologies enabling individuals corporations and nation states to reach around the world farther faster deeper and cheaper than ever before friedman 1999 development growth economic impact of globalization edited by farhang morady hakan kapucu Ömer yalçınkaya 13 francis fukuyama 1992 suggested the new era as the end of history through which the liberal idea triumphed leading to a new global hegemony for fukuyama the only route to modernity growth and development is the neo liberal democratic path under global capitalism this optimism was not shared by all academics as globalization produced poor growth and polarization of wealth what collier terms the bottom one billion 2008 as a result there has been major criticism of the world bank and the international monetary funds in the second half of the 1990s especially with the asian financial and economic crises the response from these institutions has been vigorous they continued to believe that liberalization deregulation and privatization represent the best way forward for growth and development with 2008 world recession the world economy has faced a new challenge the emergence of powerful economies such as china india and brazil helped the world economy to grow at least for now however the unevenness of the world economy continues to cause difficulties especially the us as they feeling the threat of their competitors such as china germany and even india the victory of donald trump as the s president has represented an ideological shift from free trade advocator of global capitalism to a mixture of right wing populism before and after the presidential election he called for the revival of the american economy which has been under considerable pressure since 2008 world recession in order to prove growth rate trump has a huge challenge ahead not least to deal with the competition from south east asian economies especially china it remains to be seen whether the new us administration will continue with their populist rhetoric in this book economic impacts of globalization growth development several academicians provide different analysis of economic growth and economic development the scientific ethics and responsibility of the works in the book belong to the authors writers the book comprises of 15 chapters focusing on economic growth and economic development in the era of globalisation by taking different angles they demonstrate different problems and solutions
