## Historic Design Guidelines

1991

the hpc created design guidelines for the glen ridge historic district to codify the long standing design principles utilized in the review and approval of renovations repairs and expansion of properties in glen ridge funded by a grant from the new jersey historic preservation office and the national park service these guidelines provide an easy to use reference document for residents architects and contractors to plan projects and facilitate the hpcs design review process the design guidelines are intended to further the appreciation of the architecture setting and history of glen ridge to help ensure consistency in local decision making and to benefit property owners by clarifying community expectations these design guidelines offer information on the rehabilitation of existing buildings including new additions and new construction to offer a common body of knowledge for all participants in the review process including commission members the hpc recognized that applying design guidelines is often challenging especially in glen ridge where there is so much variety in the architecture these design guidelines are intended to codify the objective basis for the hpc s decisions and help increase public awareness of historically appropriate design however the design guidelines do not offer all of the answers or solutions to a homeowner or design team as good architectural design cannot be achieved only by applying a set of rules the challenge for both the homeowner and the hpc member is knowing how to apply the design guidelines to make sound judgments that will help preserve the architectural character of glen ridge while also allowing expressions of change and adaptation

## Glen Ridge Historic Design Guidelines

2021-09-29

report also contains information on building types and styles architectural details and ornamentation historic districts

## ***Design Guidelines***

1999

this collection of papers addresses two questions central to design and historic preservation what are the parameters of compatibility in the design of additions to historic buildings and of new infill buildings in historic districts and landscapes presented at the third national forum on historic preservation practice a critical look at design in historic preservation held at goucher college the authors include practicing and academic historic preservationists architectural historians architects landscape architects and engineers organized under the themes of melding contemporary and historic design design standards in changing environments modernism and post modernism in preservation design and engineering and preservation issues of compatibility are explored through diverse projects in locations across the united states from historic charleston sc to downtown los angeles
