fluoropolymers continue to enable new materials and technologies as a result of their remarkable properties this book reviews fluoropolymer platforms of established commercial interest as well as recently discovered methods for the preparation and processing of new fluorinated materials it covers the research and development of fluoropolymer synthesis characterization and processing emphasis is placed on emerging technologies in optics space exploration fuel cells microelectronics gas separation membranes biomedical instrumentation and much more in addition the book covers the current environmental concerns associated with fluoropolymers as well as relevant regulations and potential growth opportunities concepts studies and new discoveries are taken from leading international laboratories including academia government and industrial institutions

HISTORY AND PHILOSOPHY OF SCIENCE AND TECHNOLOGY -

Volume III 2010-09-27

the modern world is filled with debate and controversy and science and technology the most characteristic features of the modern world are not immune science and technology are implicated in many if not all of the issues troubles and problems students are likely to come across in their classes and in their everyday lives science and technology serve as a primary pathway to understanding front page headlines on everything from war to aids and from oil exploration to global warming battleground science and technology examines the most hot button issues involving science and technology and provides a balanced assessment of the arguments on all sides of the often strident debates publisher

Intelligent Systems and Soft Computing for Nuclear Science and Industry 1996-07-29

air pumps electrical machines colliding ivory balls coloured sparks mechanical planetariums magic mirrors hot air balloons these are just a sample of the devices displayed in public demonstrations of science in the eighteenth century public and private demonstrations of natural philosophy in europe then differed vastly from today's unadorned and anonymous laboratory experiments science was cultivated for a variety of purposes in many different places scientific instruments were built and used for investigative and didactic experiments as well as for entertainment and popular shows between the culture of curiosities which characterized the seventeenth century and the distinction between academic and popular science that gradually emerged in the nineteenth the eighteenth century was a period when scientific activities took place in a variety of sites ranging from academies and learned societies to salons and popular fairs shops and streets this collection of case studies describing public demonstrations in britain germany italy and france exemplifies the wide variety of settings for scientific activities in the european enlightenment filled with sparks and smells the essays raise broader issues about the ways in which modern science established its legitimacy and social acceptability they point to two major features of the cultures of science in the eighteenth century entertainment and utility experimental demonstrations were attended by apothecaries and craftsmen for vocational purposes at the same time they had to fit in with the taste of both polite society and market culture public demonstrations were a favourite entertainment for ladies and gentlemen and a profitable activity for instrument makers and booksellers

Handbook of Fluoropolymer Science and Technology 2014-05-05

the relationship between science and democracy has become a much debated issue in recent years we have even seen an exponential growth in literature on the subject no doubt the interest has partly been justified by the concern of public opinion over the technological repercussions of scientific research moreover there are scientific theories that if they were accepted would allegedly imply the adoption of policies that have wide social consequences as well as a rethinking of deeply rooted habits on the part of the citizens these considerations alone allow us to understand the reasons for the interest in the at times troublesome relationships between science and public opinion which characterize democratic societies

Battleground Science and Technology 2008

this volume collects the papers presented at a conference on science pseudo science and society sponsored by the calgary institute for the humanities and held at the university of calgary may 10 12 1979 more than many such collections this one preserves some trace of the intellectual excitement which surrounded this gathering of scholars a primary inspiration for the symposium on science pseudoscience and society was a growing awareness of the crucial role the study of pseudo science plays in the areas of contemporary scholarship which are concerned with the nature of science and its relationship to broader social issues this volume is organized around three major questions concerning the relationships among science pseudo science and society the papers in the first section address the question of whether it is possible to draw a sharp demarcation between science and pseudo science and what the criteria of that demarcation might be the papers in the second section recognizing the historical importance of various of the pseudo sciences consider their impact positive or negative on the development of the sciences themselves the papers in the third section deal with the question of the relationship between the sciences and pseudo sciences on the one hand and
