1945-02

as a result of the recent expansion of nuclear magnetic resonance in biomedicine a number of workshops and schools have been organized to introduce the nmr principles to a wider group of biologists radiologists neurologists etc the aim of most of these courses was to provide a common vocabulary and enough information about pulse sequences relaxation times etc in order to facilitate the use of the various types of nmr imaging systems however no courses were organized for the physicists who were responsible for the origin and evolution of the ideas in this area this enrico fermi school was therefore organized the topics discussed included the theoretical interpretation and prediction of nmr signals the study of new imaging techniques up to the building of special r f coils and the study of new methods for analysing nmr data in the time domain

Communications de la Faculté des sciences de l'Université d'Ankara

1975

designed to be accessible this book develops a thorough functional understanding of mathematical concepts in preparation for its application in other areas concentrates on developing concepts and ideas followed immediately by developing computational skills and problem solving features a collection of important topics from mathematics of finance algebra linear programming probability and descriptive statistics with an emphasis on cross discipline principles and practices for the professional who wants to acquire essential mathematical tools for application in business economics and the life and social sciences

Ceramics, Lithics, And Ornaments Of Chaco Canyon, Analyses Of Artifacts From The Chaco Project, 1971-1978, Volume 1, Ceramics, 1997

1997

this report aims to provide an in depth analysis of teachers and school leaders perceptions of the value of their profession their work related well being and stress and their satisfaction with their working conditions it also offers a description of teachers and school leaders contractual arrangements opportunities to engage in professional tasks such as collaborative teamwork autonomous decision making and leadership practices

Construction Reports

1974

now in its revised updated third edition this best selling reference is designed for quick consultation on problems seen in infants children and adolescents more than 450 problems are covered in the fast access two page outline format that makes the 5 minute consult series titles so popular among busy clinicians the book is organized into five sections chief complaints diseases syndromes physical findings and tables

Current Housing Reports

1990

this is a print on demand edition of a hard to find publication examines offices that provide representation for indigent defendants through a salaried staff of full time or part time attorneys employed as direct gov t employees or through a public nonprofit org public defender pd offices are categorized according to whether they are funded

and admin at the state gov t level the county level or through a combination of state and county gov t topics include pd office staffing caseloads expenditures and standards and guidelines used by the nearly 1 000 pd offices across 49 states and the d c in 2007 964 pd offices across the nation received nearly 6 million indigent defense cases misdemeanor cases accounted for about 40 of all cases received by pd offices extensive charts and tables

Genetic Organization and Expression of Actin and Alpha- and Beta-tubulin Gene Families in Physarum Polycephalum

1984

defense meteorological satellite measurements of the upwelling radiation in the sounder channels of the 15 micrometer co2 band have been compared with calculations for a number of clear atmosphere conditions great care was used to ensure that complete radiosonde and rocketsonde data coincident in space and time were available the methods of transmittance and radiance calculations are described and the results compared directly with the satellite measurements the results indicate a systematic discrepancy in all but one channel calculations in general exceeded the measured radiances author

Physics of NMR Spectroscopy in Biology and Medicine

1988-09-01

novel algorithms and techniques in telecommunications automation and industrial electronics includes a set of rigorously reviewed world class manuscripts addressing and detailing state of the art research projects in the areas of industrial electronics technology and automation telecommunications and networking novel algorithms and techniques in telecommunications automation and industrial electronics includes selected papers form the conference proceedings of the international conference on industrial electronics technology and automation ieta 2007 and international conference on telecommunications and networking tene 07 which were part of the international joint conferences on computer information and systems sciences and engineering cisse 2007

College Mathematics for Business, Economics, Life Sciences and Social Sciences

2008

this book focusses on the evolution of the law and medical practice of abortion in england

Estimating the Magnitude of Annual Peak Discharges with Recurrence Intervals Between 1.1 and 3.0 Years for Rural, Unregulated Streams in West Virginia

2002

the seventh international conference on laser spectroscopy or seicols 85 was held at the maui surf hotel hawaii usa june 24 to 28 1985 like its predecessors at vail megeve jackson lake rottach egern jasper park and interlaken seicols 85 aimed at providing an informal setting for active scientists to meet and discuss recent developments and applications in laser spectroscopy the conference site on the sunny sands of famed kaanapali beach on the island of maui although perhaps not the traditional mountain resort offered nonetheless an atmosphere most inspiring to creative discussions during the unscheduled afternoons the conference was truly international 223 scientists represented 19 countries including australia canada people s republic of china denmark finland france germany frg great britain israel italy japan south korea netherlands new zealand poland spain sweden switzerland

and us a the intense scientific program included 14 topical sessions with 59 invited talks approximately 60 additional invited papers and 16 postdeadline papers were presented during three lively evening poster sessions the present proceedings contain oral as well as poster and postdeadline papers we thank all authors for the timely preparation of their manuscripts now available to a wider audience we would also like to thank the members of the international steering committee for their valuable suggestions and advice our special thanks go to the members of the program committee for their painstaking efforts

Studies Prepared for the President's Commission on an All-Volunteer Armed Force

1971

condon's major contributions were in atomic and molecular physics and spectroscopy his book with g h shortley on the theory of atomic spectra dominated the field of spectroscopy for half a century and remains an invaluable reference he also played an important role in the institutions of american science he served for many years as the editor of reviews of modern physics and with hugh odishaw he edited the still widely used handbook of physics after world war ii condon became director of the national bureau of standards now nist and helped to make it one of the premier research laboratories in the physical sciences in the world the selected scientific papers reprint many of the most important contributions condon made to atomic physics quantum theory nuclear physics condensed matter physics and other fields the selected popular writings contain articles he wrote on technical topics for such journals as the american journal of physics science and nature as well as reflections on education ufo s and other topics

TALIS 2018 Results (Volume II) Teachers and School Leaders as Valued Professionals

2020-03-23

our world is widely contaminated with damaging chemicals and companies create thousands of new potentially dangerous chemicals each year due to the difficulty and expense of obtaining accurate measurements and the unreliability of reported values we know surprisingly little about the properties of these contaminants determining the properties of chemicals is critical to judging their impact on environmental quality and in making decisions about emission rates clean up and other important public health issues chemical property estimation describes modern methods of estimating chemical properties methods which cost much less than traditional laboratory techniques and are sufficiently accurate for most environmental applications estimation methods are used to screen chemicals for testing design monitoring and analysis methods design clean up procedures and verify experimental measurements the book discusses key methods for estimating chemical properties and considers their relative strengths and weaknesses several chapters are devoted to the partitioning of chemicals between air water soil and biota and properties such as solubility vapor pressure and chemical transport each chapter begins with a review of relevant theory and background information explaining the applications and limitations of each method sample calculations and practical advice on how and when to use each method are included as well each method is evaluated for accuracy and reliability computer software databases and internet resources are evaluated as well as other supplementary material such as fundamental constants units of measure and more

Pesticides Monitoring Journal

1967

the fourth volume of the collected works is devoted to wigners contribution to physical chemistry statistical mechanics and solid state physics one corner stone was his introduction of what is now called the wigner function while his paper on adiabatic perturbations foreshadowed later work on berry phases although few in number

wigners articles on solid state physics laid the foundations for the modern theory of the electronic structure of metals

NBS Special Publication

1968

combining broad coverage with an innovative use of pedagogy atkins physical chemistry remains the textbook of choice for studying physical chemistry significant re working of the text design makes this edition more accessible for students while also creating a clean and effective text that is more flexible for instructors to teach from
