flown by the american volunteer group in china known as the flying tigers the p 40 warhawk earned a reputation for its toughness in combat facing odds of 6 to 1 in most combat situations avg pilots relied on their skill daring and their aircraft s superior diving speed to achieve victory by war s end the tigers had destroyed more than 1200 japanese planes with another 700 listed as probables their own losses came to 573

aircraft originally printed by the u s army air force for pilots transitioning to the p 40 this flight manual contains detailed information about one of history s great planes originally classified as restricted the manual was declassified long ago and is here reprinted in book form some color images appear in black and white and some pages have been slightly reformatted care has been taken however to preserve the integrity of the text

Northrop Yb-49 Flying Wing Pilot's Flight Manual 2004-09

the mikoyan gurevich mig 21 is known in nato circles as the fishbed designed as a mach 2 0 interceptor the plane holds the distinction of being produced in greater numbers than any other jet aircraft the fishbed flew in combat in vietnam where it held its own against the f 105 thunderchief during the 1973 arab israeli war 17 israeli aircraft were shot down for a loss of six egyptian mig 21s the plane also flew in combat in the indo pakistani war of 1971 during the soviet invasion of afghanistan and in yugoslavia today over 28 of the world s air forces continue to fly mig 21s originally printed by nato this english language handbook provides a glimpse inside the cockpit of this incredible plane the manual was recently declassified and is here reprinted in book form care has been taken to preserve the integrity of the text

The Instrument Flight Manual 2015

this book provides the technical details and information for the construction of a starship drive or engines it is designed for the technically minded individual or non engineer the central core of the book is the patented torque platform transport device patent number us 6 955 235 b1 provided in the book are the details for three types of drives the mother ship for interstellar travel is elegant in its simplicity an attribute required for long space missions with few moving parts the mother until i also about three times more efficient than the shuttle unit it would use the space ship itself as part of the engine a smaller unit is also possible it is basically a mother ship on a x y table it could be used as a probe to determine if a planet is habitable it is also very efficient the shuttle unit is in a class all by itself capable of lifting securable tons it can easily replace today s inefficient rocket technology instead of millions of pound of trust you can do well with two or three thousand pounds of trust and still attain the same trajectory the shuttle engine can also be used on a vertical takeoff and landing craft to go and do groceries the torque platform composed of two counter rotating flywheels is inherently unstable and must be servo controlled a servo is also provided for the turbine for a variable load to power the ship you need a reliable source of energy there are two provided a bank of one farad capacitors and sodium that reacts violently with water to rotate a turbine given are the details for electrolysis of salt to produce sodium even if the mother ship doesn't have the acceleration of the shuttle in months it can attain relativistic velocity
