## ***Noughts and Crosses; Stories, Studies, and Sketches***

2016-05-11

this book offers valuable new insights into the design of culturally aware systems in its first part it is devoted to presenting selected culturally aware intelligent

systems devised in the field of artificial intelligence and its second part consists of two sub parts that offer a source of inspiration for building modelizations of culture and of its influence on the human mind and behavior to be used in new culturally aware intelligent systems those sub parts present the results of experiments conducted in two fields that study culture and its influence on the human mind s functions cultural neuroscience and cross cultural psychology in this era of globalization people from different countries and cultures have the opportunity to interact directly or indirectly in a wide variety of contexts despite differences in their ways of thinking and reasoning their behaviors their values lifestyles customs and habits languages religions in a word their cultures they must be able to collaborate on projects to understand each other s views to communicate in such a way that they don t offend each other to anticipate the effects of their actions on others and so on as such it is of primary importance to understand how culture affects people s mental activities such as perception interpretation reasoning emotion and behavior in order to anticipate possible misunderstandings due to differences in handling the same situation and to try and resolve them artificial intelligence and more specifically the field of intelligent systems design aims at building systems that mimic the behavior of human beings in order to complete tasks more efficiently than humans could by themselves consequently in the last decade experts and scholars in the field of intelligent systems have been increasingly tackling the notion of cultural awareness a culturally aware intelligent system can be defined as a system where culture related or more generally socio cultural information is modeled and used to design the human machine interface or to provide support with the task carried out by the system be it reasoning simulation or any other task involving cultural knowledge

## **Baseline study of cross-border data exchange in the Nordic and Baltic countries: Final report**

2021-11-29

delve into the fascinating history of sepulchral slabs and crosses of the middle ages with this informative manual edward lewes cutts covers everything from their symbolic significance to the techniques used in their creation making this book an invaluable resource for scholars and historians this work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it this work is in the public domain in the united states of america and possibly other nations within the united states you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public we appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant

## **Comparative Studies on the Pathology, Pathogenesis and Cross Infectivity of Vesicular Exanthema of Swine Virus and San Miguel Seal Lion Virus in Swine and Seals**

1980

cross cultural studies is the culminating effort of a distinguished team of international scholars who have worked since the mid 1980s to create the most complete analysis of caribbean literature ever undertaken conceived as a major contribution to postcolonial studies cultural studies cultural anthropology and regional studies of the caribbean and the americas cross cultural studies illuminates the interrelations between and among europe the caribbean islands africa and the american continents from the late fifteenth century to the present scholars from five continents bring to bear on the most salient issues of caribbean literature theoretical and critical positions that are currently in the forefront of discussion in literature the arts and public policy among the major issues treated at length in cross cultural studies are the history and construction of racial inequality in caribbean colonization the origins and formation of literatures in various creoles the gendered literary representation of the caribbean region the political and ideological appropriation of caribbean history in creating the idea of national culture in north and south

america europe and africa the role of the caribbean in contemporary theories of modernism and the postmodern the decentering of such canonical authors as shakespeare the vexed but inevitable connectedness of caribbean literature with both its former colonial metropolises and its geographical neighbors contributions to cross cultural studies give a concrete cultural and historical analysis of such contemporary critical terms as hybridity transculturation and the carnivalesque which have so often been taken out of context and employed in narrowly ideological contexts two important theories of the simultaneous unity and diversity of caribbean literature and culture propounded by antonio benítez rojo and douard glissant receive extended treatment that places them strategically in the debate over multiculturalism in postcolonial societies and in the context of chaos theory a contribution by benítez rojo permits the reader to test the theory through his critical practice divided into nine thematic and methodological sections followed by a complete index to the names and dates of authors and significant historical figures discussed cross cultural studies will be an indispensable resource for every library and a necessary handbook for scholars teachers and advanced students of the caribbean region

## **New Challenges in Globalized Societies: Cross-cultural Studies and Test Adaptation**

2022-06-01

literature on covariation judgments has suggested that such judgments are effected by task data and subject characteristics however as a general rule research studies have been confined to only one or two situations or sets of traits in this paper data from several studies are pooled in order to mitigate the effects of specific characteristics and a lens model analysis is done it is found that subject achievement is high in the covariation task as opposed to tasks used in other lens model studies however subjects did not use all of the available information to the extent specified in the statistical covariation model the normativeness of this model is questioned author

## **Cross-Cultural Studies of Personality, Attitudes and Cognition**

1988-11-29

this report is an evaluation of a general explanatory theory of the conditions of violent civil conflict the theory is tested through application of complex and powerful statistical techniques to data from a large number of nations author
