The Ultimate Student Teaching Guide 2013-12-26 renewable and carbon neutral energy have been promoted as the future of energy production in the united states non traditional energy sources show promise as alternatives to fossil fuels and may provide a sustainable source of energy in increasingly uncertain energy markets however these new sources of energy face their own set of political administrative and legal challenges green vs green explores how mixed land ownership and existing law and regulation present serious challenges to the development of alternative energy sources in the united states analytically examining and comparing five green energy sectors wind solar geothermal biofuel and hydro power ryan m yonk randy t simmons and brian c steed argue that discussing alternative energy without understanding these pitfalls creates unrealistic expectations regarding the ability to substitute green energy for traditional sources the micro goals of protecting individual areas species small scale ecosystems and other local environmental aims often limits ability to achieve macro goals like preventing global climate change or transitioning to large scale green energy production statutes and regulations designed to protect environmental and cultural integrity from degradation

directly conflict with other stated environmental ends although there is substantial interest in adding clean energy to the grid it appears that localized environmental interests interfere with broader environmental policy goals and the application of existing environmental laws and regulations may push us closer to gridlock green vs green provides a fascinating look into how existing environmental law created or will create substantial regulatory hurdles for future energy generations

Improving Urban Schools 2013-04-01 the first books to present specific guidance for teaching the common core state standards forty three states plus the district of columbia and the u s virgin islands have signed on to adopt the common core state standards ccss the need for curriculum guides to assist teachers in helping students meet these standards has become imperative created by teachers for teachers the research based curriculum maps in this book present a comprehensive coherent sequence of thematic units for teaching the skills outlined in the ccss for english language arts in grades 9 12 teachers can use the maps to plan their year and craft their own more detailed lesson plans each grade is broken down into six units that include focus standards suggested works sample activities and assessments lesson plans and more the maps address every standard in the ccss yet are flexible and adaptable to accommodate diverse teaching styles any teacher school or district that chooses to follow the common core maps can be confident that they are adhering to the standards
