Berlin 1961-01 this book is based on the premise that humankind is first and foremost the outcome of the process of biological evolution recognition of this is fundamental to our understanding of who we are and how we behave all living things have evolved the physical and mental attributes that promote their prospects for survival they are good at doing the things that enable them to pass on their genes to succeeding generations and we are no exception of course through the development of culture we have gained some freedom from our biological origins nevertheless evolution has constructed the foundation upon which culture is built the first part of the book ourselves interacting with the world presents an overview of the main capabilities that evolution has endowed us with and that enable us to interact with the environment in advantageous ways this includes our senses which act as windows on the world and also of great importance our emotions and ability to remember our ability to think is perhaps the crowning achievement of our evolutionary journey and of course we must be able to act in a timely and effective manner the second part of the book living together traces the history of how we became social creatures to be truly

human we had to be capable of sharing and cooperation we also needed to be able to control our aggressiveness and talent for deception we settled down making the transition from hunter gatherers to urban dwellers and agreed upon values and norms of behavior that enhanced our ability to get along ultimately we came to see good and bad as a morality of right and wrong further augmenting group cohesiveness in the final part of the book challenges and opportunities attention turns to a consideration of the constraints and possibilities that must be considered in looking to the future these realities can be seen to play out in four social arenas the pursuit of fairness the seeking of justice the interplay of political beliefs and good government and ultimately a united society that is at the same time a true community our quest for these things will be greatly aided by a deep knowledge and appreciation of our evolutionary past and the indelible imprint it has left upon us it may even lead us to that most elusive of all things happiness

Exploring Psychology 2019-07-01 why things go right the science of psychology an appreciative view by laura king university of missouri at columbia is the first text to bring a truly appreciative view of psychology as a science and for exploring behavior to introductory students it is built around the idea that students must study the discipline of psychology as a whole that the sub disciplines are intricately connected and that human behavior is best understood by exploring its functioning state in addition to its potential dysfunctions for example imagine that you have been asked to create a science of watchology you have two watches that both have had the unfortunate trauma of being left in the pocket of someone's jeans through the washer and dryer one watch has suffered the worst possible fate it no longer tells time the other has emerged from the traumatic event still ticking which watch would you use to develop your new science of watchology clearly the working watch will help you understand watches better than the broken one what does watchology have to do with psychology quite simply in psychology as in watchology it makes sense to start with what works to gain a general understanding of human behavior and then apply that knowledge to those who have emerged from life's experiences in dysfunction
