Medical Terminology for Interpreters

2010-01-01

volume 16 of progress in self psychology how responsive should we be illuminates the continuing tension between kohut s emphasis on the patient s subjective experience and the post kohutian intersubjectivists concern with the therapist s own subjectivity by focusing on issues of therapeutic posture and degree of therapist activity teicholz provides an integrative context for examining this tension by discussing affect as the common denominator underlying the analyst s empathy subjectivity and authenticity responses to the tension encompass the stance of intersubjective contextualism advocacy of active responsiveness and emphasis on the thorough going bidirectionality of the analytic endeavor balancing these perspectives are a reprise on kohut s concept of prolonged empathic immersion and a recasting of the issue of closeness and

distance in the analytic relationship in terms of analysis of the tie to the negative selfobject additional clinical contributions examine severe bulimia and suicidal rage as attempts at self state regulation and address the self reparative functions that inhere in the act of dreaming like previous volumes in the series volume 16 demonstrates the applicability of self psychology to nonanalytic treatment modalities and clinical populations here self psychology is brought to bear on psychotherapy with placed children on work with adults with nonverbal learning disabilities and on brief therapy rector s examination of twinship and religious experience hagman s elucidation of the creative process and siegel and topel s experiment with supervision via the internet exemplify the ever expanding explanatory range of self psychological insights

Linguistic Self-criticism

1937

this book argues that anatomy and biology frame our gender sex and class but they do not decide our possibilities our life styles are our own constructions and expressions of self definition teodros kiros supports his argument by a careful reading of the literature from both the global south and global north that spans figures works and eras from antiquity to our late modern present

European Romanticism

2020-04-03

self esteem is a concept which everybody experiences but there is conceptual confusion between self feelings and self conceptions this book addresses the issue by replicating past studies with analysis of original data and proposing a three factor theory of self sentiments consisting of self esteem self efficacy and self activation
