trauma dissociation and  
disease

media have long chronicled the lives of people with dissociative identity disorder did formerly known as multiple personality disorder the dissociative identity disorder sourcebook serves as a much needed bridge for communication between the dissociative individual and therapists family and friends who also have to learn to deal with the effects of this truly astonishing disorder

## **The Haunted Self: Structural Dissociation and the Treatment of Chronic Traumatization 2006-11-17**

life is an ongoing struggle for patients who have been chronically traumatized they typically have a wide array of symptoms often classified under different combinations of comorbidity which can make assessment and treatment complicated and confusing for the therapist many patients have substantial problems with daily living and relationships including serious intrapsychic conflicts and maladaptive coping strategies their suffering essentially relates to a terrifying and painful past that haunts them even when survivors attempt to hide their distress beneath a facade of normality a common strategy therapists often feel besieged by their many symptoms and serious pain small wonder that many survivors of chronic traumatization have seen several therapists with little if any gains and that quite a few have been labeled as untreatable or resistant in this book three leading researchers and
