such places as journals memoirs and sales catalogues but like the single and small groups of unpublished letters scattered in libraries around the world they remained in practical terms inaccessible even though in recent years small groups of letters to individual correspondents have come into print the rapidly growing numbers of gissing readers and scholars now feel the need for access to his letters in an edition comparable to those of his contemporary novelist friends thomas hardy and joseph conrad in this edition all the gissing letters that could be found published and unpublished have been brought together from all known sources private and public collections journals newspapers memoirs biographies and sales catalogues the important advantage is not only that they have at last been brought together but also that they are placed chronologically and given a uniform editorial context which provides a coherence lacking in letters separately published a significant feature of this edition is that it also contains whenever they are available letters to gissing which are of great help in recording his life during the times when his own letters have been lost or destroyed with the recent publication of gissing s diary his commonplace book and other smaller pieces this edition becomes the final major publication of gissing papers known to exist and certainly the most significant record of his life his mind and his art it will be of crucial importance to any future biographers and of the greatest value to those who want to study gissing s novels in relation to his life

this translation makes available for the first time to english speaking readers petrarch s earliest and perhaps most important collection of prose letters they were written for the most part between 1325 and 1366 and were organized into the present collection of twenty four books between 1345 and 1366 the collection represents a portrait of the artist as a young man seen through the eyes of the mature artist whether in the writing of poetry or being crowned poet laureate or in confessing his faults describing the dissolution of the kingdom of naples summoning up the grandeur of ancient rome or in writing to pope or emperor petrarch was always the consummate artist deeply concerned with creating a desired effect by means of a dignified gracefulness and always conscious that his private life and thoughts could be the object of high art and public interest as early as 1436 leonardo bruni wrote in his life of petrarch petrarch was the first man to have had a sufficiently fine mind to recognize the gracefulness of the lost ancient style and to bring it back to life it was indeed the very style or manner in which petrarch consciously sought to create the impression of continuity with the past that was responsible for the enormous impact he made on subsequent generations this complete translation by aldo s bernardo has long been out of print and is reproduced here in its entirety in three volumes vol 3 books xvii xxiv introduction notes bibliography
